Press Release

TMD Technologies' microwave electronics featured at IMS Symposium

TMD Technologies will be highlighting its full range of microwave tubes, high voltage power supplies, MPMs and amplifiers at the IEEE's International Microwave Symposium in Anaheim, CA in May 2010.

From its rugged amplifier range, the UK company will focus on its pulsed and CW microwave power modules for radar, EW and communications. These MPMs have the advantages of being ultra compact and lightweight as well as offering high efficiency and reliability. They are also fully integrated, making installation safe and simple.

Also featuring on the stand will be the innovative PTX7602 S-band transmitter for commercial or military air traffic control, which offers enhanced features and user benefits.

As well as components for radar, EW and communications applications, TMD will be displaying its instrumentation TWTAs for high intensity RF EMC testing and other laboratory applications.

TMD Technologies can be found on Stand 2741 at the IEEE International Microwave Symposium Exhibition on 25-27 May 2010, Anaheim, CA, USA. Website www.ims2010.org/

Notes for editors

TMD Technologies Ltd is one of the world's leading designers and manufacturers of specialised transmitters for radar and EW applications, high voltage power supplies and microwave tubes. The multiple Queen's Award winning company also produces a range of advanced commercial microwave amplifiers for EMC testing and scientific applications.

All the UK company's operational activities are carried out at its West London premises, helping to ensure a smooth transition between development and production.
